

will banish the black mist. In order to protect the Peace Constitution and protect democracy, we oppose the small electoral district system. In order to eliminate the tyranny of the majority and normalize the Diet, we will revise Diet-related laws, [require] the renunciation of party affiliation by the speaker and vice speaker, establish a petitions committee, and will distribute chairmanships of standing and special committees in accordance with the proportion of seats held by the various parties. In addition, as for forcible adoption [of legislative bills] and other unfair voting [practices], we will realize the power of the speaker to suspend these, and so on.

JAPAN COMMUNIST PARTY (JCP) 54:69

1. Security and Okinawa

Along with the return of sovereignty, the conclusion of an Okinawa return agreement that decides the complete withdrawal of all U.S. military bases and the withdrawal of U.S. troops and the realization of the complete return of Okinawa Prefecture. We will immediately establish a "Special Measures Law for the Recovery of Okinawa Prefecture" and will strive for the recovery of the Okinawan economy and the peaceful development of its economy. We oppose the scheme in the Japan-U.S. joint statement to revise the Security Treaty for the worse to allow the free conduct of sorties by U.S. troops in return for a "hidden nuclear weapons return" and uses all of Japan as the fulcrum in an Asian anti-communist military alliance. We will create a democratic front government through a united front of peace, neutrality and democracy, will abrogate the Security Treaty by utilizing the

"termination notification" of Article Ten of the Security Treaty, and will realize an independent, democratic and neutral Japan where no military alliances of any kind are needed. The unconstitutional Self-Defense Forces will be disbanded, we will not maintain a military under the present Constitution, and future defense measures will be decided by the general will of the people.

2. Tax Cuts and the Cost of Living

We will raise the point of exemption for income taxes, resident taxes, and enterprise taxes for a four-member family to 1.3 million yen. We will increase deductions for the necessary living expenses of wage earners. We will abolish special privilege tax reductions of big capital and will prosecute big tax evaders. We will put an end to the big capital-oriented growth policies, the root of price level increases. We will conduct audits of large corporations in the Diet and lower monopoly prices. We will change the framework that provides low cost public utility charges to large corporations and hold down rate increases, and will put an end to inflationary policies. We will prohibit land speculation by large corporations and will strive for land price stability.

3. The Universities

We will eliminate the University Law and other interference by the government as well as violence by certain Trotskyists, defend university self-government, and promote the autonomous and democratic resolution of issues. We will democratize the universities through all-university deliberation committees,

restrain mass productionization through the expansion and improvement of the capacities of national university facilities and increases in national subsidies to private universities without attached control measures, and will improve the conditions for education and research. We will make the university system something that will correspond to the development of scholarship and technology and answer the desires of the people. We will oppose the "new concept universities" and other reactionary proposals for reform of the university system which have as their purpose the "human development" demanded by big business.

4. The Rice Crop

Rice surpluses and restrictions on planting indicate the complete failure of LDP agricultural policy. We will hold down the import of foreign agricultural commodities and establish protection policies aimed at the autonomous comprehensive development of Japanese agriculture. We will oppose self-distributed rice, which amounts to official recognition of blackmarket rice; will make sure that production will not be concentrated on rice only through a dual price system for rice, wheat and other major agricultural commodities; and will strive for diversified and balanced development of agriculture, including dairy products, vegetables, and fruits. We will stabilize the operations of small and medium-scale farmers through the cooperative utilization of machinery and land reclamation at state expense.

5. Parliamentary Politics

We will censure secret Japan-U.S. diplomacy and

conspiratorial dissolutions that ignore the sovereignty of the people and Diet and, in the event of treaties, agreements, joint resolutions and other important arrangements with foreign countries, will make sure that the Diet approves [them]. We will fully implement the democratic articles of the Diet Law such as the guarantee of the right of the speakers to speak and will fundamentally renovate Diet procedures. We will oppose the LDP's fascistic forced passages and will not go along with mechanical Diet tactics that provide the excuses for these. We will prohibit the political funding of the big business world that desecrates parliamentary politics. We will make the Diet literally "the supreme organ of national sovereignty" and will establish parliamentary democracy.
