

quantities. 2) The resolute execution of a 200 billion yen tax cut. We will implement a lightening of the burden of income taxes, resident taxes and other mass taxes imposed on the small and middle income strata as well as implement the lightening and rationalization of corporate taxes, which will contribute to the expansion of exports, the modernization of small and medium-sized businesses, and the international competitiveness of industry.

JAPAN SOCIALIST PARTY (JSP)

02:63

1. Basic Political Stance

1) We will realize democratic politics for the sake of the nation's happiness. We will raise the status of the Diet as the highest organ of state power and will make it a parliament that is linked directly to the people. For this purpose, we will fully implement the public management of elections and make sure that individuals who widely represent the voice of the people are selected. We will revise the system of majority rule deciding everything and respect government party-opposition party talks. With regard to the major items of national policy, we will establish the practice of [placing these before] the judgement of the people through dissolution [of the Diet]. 2) Along with fundamentally reforming the political and economic arrangements which serve monopoly capital into those which reflect the will of the people, we will actively nurture local government and conduct politics which truly serve the nation.

2. Constitution

1) We oppose Constitutional revision and will fight

aggressively to that end. The present Constitution achieves government by the people, absolute peace, and respect for human rights and has a content that can be displayed to the world with pride. 2) The government and the LDP aim to change these three great spirits fundamentally and aim for openly rearming, sending troops overseas, restricting human rights, and repressing democratic politics. We oppose de facto revision for the worse and evisceration of the Constitution through laws and regulations. We will fight for the protection of the Constitution and its full implementation.

3. Foreign Policy and Defense

1) Alter the U.S.-only foreign policy and dissolve the Security Treaty and establish a foreign policy line of autonomous independence and positive neutrality. 2) We oppose port calls by nuclear submarines and the deployment of F-105D's. We will oppose Japan-South Korean talks. We will conclude Sino-Japanese and Japan-Soviet peace treaties. We will expand equal and reciprocal trade with all countries. 3) We oppose the nuclear armament of Japan. We will change the Self-Defense Forces to a National Land Construction Peace Corps and make it the core of a great reconstruction of the national land.

4. Economy

1) We oppose the income doubling policy because it has resulted in the doubling of the "three evils" of a rising cost of living, expanding disparities, and an increase in social unrest. 2) We will endeavor to transform big capital-oriented policies, advance planification of the national economy and socialization,

and realize a balanced growth economy. Also, we will prepare the various domestic conditions for coping with liberalization. We will not begrudge no-strings-attached cooperation in the economic development of the various countries of Asia and Africa and will strengthen friendly relations.

5. Industry

On the basis of a "farmer's constitution," we will build prosperous farming villages. Through agricultural machinery stations and service centers run by national and local government organs, we will implement the modernization of management and the cooperativization as well as decrease prices for fertilizer, animal feed, etc. 2) The promotion and protection of fisheries. We will make these farming and fishing villages in which youth can find hope. 3) We will advance the modernization and cooperativization of small and medium-sized businesses. We will regulate the tyranny of large corporations and strive for their [i.e., small and medium-sized businesses] encouragement by establishing preferential tax and financial measures.

6. Education

1) We will prevent reactionary modification of education and will aim for the improvement of the living environment of minors and educational facilities and the fostering of people who are democratic and healthy. 2) We will strive to make compulsory education completely free and realize the acceptance into high school of all those who desire to do so while promoting working students' and social education. We will protect the autonomy of the universities and freedom of learning and thought and will endeavor to remove the gaps among colleges. We oppose

the revival of the old "teacher's schools." We will strive for the rapid development of scientific technology through state funding.

7. Public Safety and Labor

1) We will prevent the central domination of the police system and will shift from an emphasis on maintaining public peace to the creation of a police system that will protect the lives of the people. For the time being, we will strive for the improvement of traffic and criminal affairs police and, together with the construction of a healthy society, will endeavor to prevent vicious crimes and the completely eliminate traffic accidents. We will strictly prosecute right wing terrorism and cut off its sources of funds. 2) We will establish a "Basic Law for Employment" and strive for the expansion of employment. The national government and local governments will conduct job training for job-leavers and will secure jobs.

8. National Life

1) The lowering of monopoly price levels. The holding down of public utility fee hikes. The improvement of the distribution system and the direct linking of producers and consumers. 2) . The restraining of land speculation and the liberation of fallow land. We will supply cheap land for housing through taxes on vacant lots and so on, construct low-rent housing and worker apartments, etc., in massive quantities, and make one house per household a reality. 3) We will greatly lower income taxes and make income of up to 50,000 yen per 5-member household nontaxable, alter and abolish special tax measures for large

corporations, and greatly raise national pensions.

DEMOCRATIC SOCIALIST PARTY (DSP) 63:63

1. Basic Political Stance

1) The future of the world is the social democratic society that realizes equality, liberty, peace, and prosperity under the great principle of democracy. Our party will realize in a planned manner policies for the construction of a welfare state for those who work, overcome capitalism, and open the way toward weakening conservative power. 2) The time is now passed when the progressive parties can maintain an attitude of "permanent opposition" and refusing deliberation. In the arena of parliamentary politics, our party will confront the LDP with constructive and realistic policies that further the interest of the nation and thereby drive them into a difficult position. It is breaking through the Diet's spinning of its wheels caused by the false confrontation between the two major parties of the LDP and JSP that will in fact normalize the Diet and is the way toward the establishment of democratic politics.

2. Constitution

1) Our party is the only party that pledges in its platform to defend the present Constitution of rule by the people, democracy, and pacifism. 2) We will oppose to the end the "piecemeal Constitutional revision" of the LDP. And, the JSP's is a tactical protection of the Constitution that aims to protect the Constitution until attaining control of the government and revise the Constitution at the stage of socialist revolution and
