

corporations, and greatly raise national pensions.

DEMOCRATIC SOCIALIST PARTY (DSP) 03:63

1. Basic Political Stance

1) The future of the world is the social democratic society that realizes equality, liberty, peace, and prosperity under the great principle of democracy. Our party will realize in a planned manner policies for the construction of a welfare state for those who work, overcome capitalism, and open the way toward weakening conservative power. 2) The time is now passed when the progressive parties can maintain an attitude of "permanent opposition" and refusing deliberation. In the arena of parliamentary politics, our party will confront the LDP with constructive and realistic policies that further the interest of the nation and thereby drive them into a difficult position. It is breaking through the Diet's spinning of its wheels caused by the false confrontation between the two major parties of the LDP and JSP that will in fact normalize the Diet and is the way toward the establishment of democratic politics.

2. Constitution

1) Our party is the only party that pledges in its platform to defend the present Constitution of rule by the people, democracy, and pacifism. 2) We will oppose to the end the "piecemeal Constitutional revision" of the LDP. And, the JSP's is a tactical protection of the Constitution that aims to protect the Constitution until attaining control of the government and revise the Constitution at the stage of socialist revolution and

cannot be considered true protection of the Constitution. Our party will continue to protect the present Constitution as it is.

3. Foreign Policy and Defense

1) The foundation of foreign policy is peace and autonomous independence. We will abandon the two lines of the LDP's follow-the-U.S. and the JSP's pro-Communist anti-U.S. [policies] in the name of neutrality, will advance an autonomous and independent foreign policy based on the perspective of the people, and will cooperate in the stabilization of the people's lives in South Korea. 2) We will prepare the minimum defense recognized in the Constitution and will gradually dissolve the Japan-U.S. Security Treaty. We will cooperate internationally in the banning of nuclear testing and nuclear armaments and in the realization of world disarmament and will oppose port calls by unsafe nuclear submarines.

4. Economy

1) The LDP policies oriented toward increasing facilities investment by large corporations brings with it cost of living increases and a worsening of the international balance of payments and cannot prevent recessions. For the purpose of the simultaneous realization of economic stability, balance, and high growth, we will promote the modernization of small and medium-sized businesses and agriculture, forestry and fisheries, will strengthen state regulation of large corporation operations, raise productivity through labor-management consultation, will promote cost reductions and wage hikes, and will continue an annual economic growth rate of 9 percent. 2) We will advance

the U.N.-centered development of less-developed countries and provide for economic cooperation with Asian countries in particular.

5. Industry

1) We will encourage the modernization of society and economy. We will remove concentrated financing directed at large corporations, secure modernization funds, and ban unfair lending on combined percentage and reserve terms. We will strengthen overdue assistance to small-scale businesses, protections for subcontractors, and measures for the commercial and services industries. 2) We will advance the cooperativization of production by getting rid of machinery purchases by individual farm households and other waste, open up state-owned forests, improve the agricultural and forestry base with land improvements and so on, and promote coastal fisheries with a focus on the fisheries cooperatives.

6. Education

1) The basic goal of educational policy will be to develop the abilities of youth to the highest degree possible and create a well-rounded human character among all citizens that is independent and self-respecting as well as conscious of social responsibility and cooperative toward the public good. We will fight the LDP's policies of creating a labor force that is at the beck and call of capital. 2) We will aim to make high school education compulsory by increasing the number of high schools and removing the difficulties of gaining entrance. We will strive for such measures for the qualitative improvement of education as the increasing of scholarships, the provisioning of compensation

for research by teaching staffs, and the improvement of university research facilities.

7. Public Safety and Labor

1) Priority strengthening of police power for the sake of serving residents. We will stamp out political violence regardless of whether it is done by groups or by individuals. In order to prevent vicious crimes, we will promote the enhancement of scientific investigatory functions and the democratization of the police force such that it can actively seek the cooperation of the citizenry. 2) The thorough implementation of a minimum wage system and technical training for youth. The institutionalization of state guaranteeing of employment for the middle aged (35 and above) and job leavers. We will strive for the improvement of compensation for workers on unemployment relief and for the realization of full employment and its qualitative improvement.

8. National Life

1) We will restrict competition in investment and expansion among large corporations and this will restrain monetary expansion for the sake of financing. We will promote the modernization of small and medium-sized businesses, agriculture, and fisheries, lower production costs, and force the lowering of monopoly prices of the products of large corporations by a large measure. We will halt hikes in public utility charges. We will dissipate the housing crisis and high housing prices by building 500,000 units of public housing per year for three years in a row. 2) Under a lowering-of-taxes-on-the-masses policy of not

taxing living expenses, we will make up to 50,000 yen of monthly income per 5-member household tax-free.

JAPAN COMMUNIST PARTY (JCP) 04:63

1. Basic Political Stance

1) We oppose the Ikeda Cabinet and the LDP, which aim for the forcible implementation of the new Security Treaty, and their reactionary and traitorous politics of reviving militarism and imperialism in subservience to the U.S., promoting nuclear armament, and destroying the livelihood of the people. We will oppose "Diet normalization" through tyranny of the majority and will strictly punish false certifications, bribery, and other unlawful election [practices] and will stamp out unfairness and corruption in the bureaucracy. 2) We will destroy the Security Treaty, withdraw U.S. military forces, remove bases, have Okinawa and the Ogasawaras returned, disband the Self-Defense Forces, and sweep away organs of repression, as well as control monopoly corporations and strive for rapid improvement in the people's livelihood through autonomous and peaceful development of the economy. Aiming for the independence of Japan, democracy, peace, and neutrality, we will establish a democratic front government that opposes the security treaty.

2. The Constitution

1) We oppose revision of the Constitution for the worse aimed at the revival of militarism, the reactionarization of politics, and conscription and overseas deployment of troops. We aim for full implementation of the pacifist and democratic
